

**NATIONAL INSTITUTE OF TECHNOLOGY
SRINAGAR**

Innovation, Incubation & Entrepreneurship Development Centre

No.: - IIEDC/ 15/2018-②
Dated: - May 14, 2018

NOTICE

IIED Center in collaboration with National Innovation Council under the guidance of **Mr. Vikas Chawda** (Innovation Expert at National Innovation Council) is going to start ToD FoD JoD programme at NIT Srinagar.

To foster Innovation at an early stage and to create an innovative mindset in the youth, National Innovation Council (NInC) has proposed the creation of ToD FoD JoD (TFJ) centres in schools and colleges. The aim is to provide a hands-on learning environment where students can de-construct, re-construct or re-purpose everyday objects that they see or use. TFJ will not only allow students to understand the scientific principles behind everyday products they use, but also help the expand their horizons to larger concepts and application to enable them to solve real world problems. NInC has conducted TFJ sessions in selected schools and feedback from students highlights a complete change in perception of students towards machines and devices. They have become more curious and inquisitive - critical for nurturing an innovative mindset. With this hope NIT Srinagar is willing to start ToD FoD JoD centre, to excite and challenge young minds inside the campus as well as create a fun learning environment.

Important details:

Available Seats - 20

Last date for entry- **May 18, 2018**
